

 **Nomads Utility**
March 5, 2024

Nomads Abstract:

Nomads is an NFT-based travel community for the modern traveler (i.e. Nomadic workers / travelers / adventurers), with web3 travelers being one major sub-set of this.

We want to provide a place for like-minded travelers to congregate & collaborate, and we will give extra enticements for participation via rewards, giveaways, special access & alpha, etc. We will also tie Nomads closely to the TripRecs app, for long-term special privileges and utility.

We see web3 as a major cohort of travelers that live out member personal and our use-cases day in & day out, and are, thereby, highly likely to find strong use in what we're doing.. Hence activating the web3 community via an NFT here in the first place.

There are so many web3 use cases for our platform, e.g. web3 events block hotel bookings (which we can drive via concierge services, in addition to via our automation), pre/post event travel for attendees, Nomadic remote-work getaway, etc. We're excited to explore & collaborate!

Nomads (Native) Utility Rundown:

Nomads Gen0 'The Basics':

- **Chain:** Solana
- **Supply:** 555
- **Price:** 0.5 SOL
- **Launchpad:** Magic Eden
- **Art / Structure:** Generative set of x3 base characters + x3 1/1s

Why Solana: Most of our team are long-term / deep crypto/web3 inhabitants; two of which have spent years in Solana and have made it home. Solana was an easy choice to get this started.

How Nomads x TripRecs intertwine (Nomads > TripRecs Utility):
